RE: Opposition of the proposed 5G Cell Phone Delivery System

Hon. Congresswoman Slotkin,

It has come to my attention that the proposed next generation 5G cell phone delivery system is extremely problematic. In that, it uses microwave radio frequencies similar to those used in a household microwave for the 5G data transmission.

Those most affected will be the inner-city urban areas, where delivery antennas will be placed every 500 feet or so, and that mostly populated by African Americans and other low-income ethnic minorities.

As I and others believe this is dangerous to health and potentially fatal; I write to you in opposition of this system being implemented, and ask that you too see the value of my opposition, and thus would accordingly oppose it final implementation.

Elaborations on the details regarding my opposition, and that may be found at the following webpage:

<https://workin4alivin.com/5g-phone-opposition/>

Thank you for your time and attention to this very serious, and potentially life-threatening matter.

In Kind Regard,
